PATTERN #4 – 6x3, 6x6 & 6x9

Modules of 3 ft<sup>2</sup>, each requiring the following pieces:

4 – 6 x 3 x 2 ¼ or 2 ¾

4 – 6 x 6 x 2 ¼ or 2 ¾

4 – 6 x 9 x 2 ¼ or 2 ¾

Example: A 10' x 30' patio is 300 ft<sup>2</sup>. Divide the number of square feet desired by the square feet per module and multiply the quotient by the number of pieces required for each size.

$$300 / 3 = 100$$

$$100 \times 4 = 400 \text{ pieces of } 6 \times 3$$

$$100 \times 4 = 400 \text{ pieces of } 6 \times 6$$

$$100 \times 4 = 400 \text{ pieces of } 6 \times 9$$
