PATTERN #7 – 6x3, 6x6 & 6x9

Modules of 3 ft², each requiring the following pieces:

- 4 – 6 x 3 x 2 ¼ or 2 ¾
- 4 – 6 x 6 x 2 ¼ or 2 ¾
- 4 – 6 x 9 x 2 ¼ or 2 ¾

Example: A 10’ x 30’ patio is 300 ft². Divide the number of square feet desired by the square feet per module and multiply the quotient by the number of pieces required for each size.

\[
\frac{300}{3} = 100 \quad 100 \times 4 = 400 \text{ pieces of 6x3} \\
100 \times 4 = 400 \text{ pieces of 6x6} \\
100 \times 4 = 400 \text{ pieces of 6x9}
\]
