PATTERN #8 – 4x8, 8x8 and 6x6

Modules of 4.33 ft\(^2\), each requiring the following pieces:
- 7 – 4 x 8 x 2 ¼ or 2 ¾
- 4 – 6 x 6 x 2 ¼ or 2 ¾
- 4 – 8 x 8 x 2 ¼ or 2 ¾

Example: A 10’ x 30’ patio is 300 ft\(^2\). Divide the number of square feet desired by the square feet per module and multiply the quotient by the number of pieces required for each size.

\[
300 / 4.33 = 69
\]

69 x 7 = 483 pieces of 4x8
69 x 4 = 276 pieces of 6x6
69 x 4 = 276 pieces of 8x8

Pattern may be mirrored to provide the illusion of a random bond.
